SUMMARY /

Product designer and design engineer. At Pickleball.com I keep six interconnected products feeling like one, from UX architecture to the shared components the platform standardized on. Because I build, my design decisions survive contact with production instead of dying at handoff.

EXPERIENCE /

Pickleball, Inc. — Senior Product Designer

Remote (US) · Feb 2024 – Present

- UX architecture and interface design across six interconnected products (Pickleball.com, Tournaments, Team Leagues, Leagues, Clubs, World Pickleball Rankings), on a platform with 4M+ matches played and 22K+ tournaments hosted.
- Redesigned the tournament page across all 13 of its tabs; one Contact-button change cut misdirected support messages by 90%.
- Led the V2 of the core consumer surfaces (Homepage, Search, Listings) across four products, expanding the brief from a homepage redesign to the full search journey.
- Built the shared card and search components adopted platform-wide; co-built native iOS and Material 3 component libraries carrying two mobile apps, with a third starting from the same common screens.
- Designed pickleballclubs.com end to end, including its admin area and reservation setup.
- Introduced the Figma structure that became the team-wide standard.

Bild — UI/UX Designer → Lead Designer

Podgorica, Montenegro (hybrid/remote) · Sep 2022 – Feb 2024

- Introduced a new UX research approach, a documentation methodology, and a handoff process; promoted to Lead Designer.
- Led four major client projects from concept to delivery.
- Key projects: Balkan Transfer, Cuckoo, Investisseur Privé, Hill Metrics, WeCare, Soland.

Agency Look — UI Designer → UI/UX Designer

Istanbul · Mar – Sep 2022

- Promoted within two months; designed for high-profile corporate clients.
- Key projects: Akbank Wings, Fibabanka, Allianz, Juzdan, Doruk Faktoring.

Morpa — UI/UX Designer

Istanbul · Jun 2021 – Mar 2022

- Designed the core application, used by 1M+ active users, as one interface shared by the student, teacher, parent, and administrator apps.
- Key projects: Morpa Kampüs (four apps), Morpa Ders.

Freelance — Designer

2018 – 2021

- Branding, social media, and UI/UX for direct clients across three and a half years, alongside my degree.

SIDE PROJECTS /

VOLGEN — [volgen.ai](#) · Designed & built solo 2025

Site for an AI video production studio: research to live in three days. Next.js, bilingual TR/EN, a CRM pipeline, and a login-gated admin the client runs without me. NotebookLM for research and IA; built with AI coding agents, every decision mine.

aydinswork.com · Designed & built solo
Custom portfolio in Next.js with GSAP motion and Matter.js physics. Designed, written, and shipped end to end.

PickleIQ (working title) — In development 2026

Live-score companion app for pickleball fans following pro events, matches, and results in real time. Designed and built solo with AI coding agents.

SKILLS /

Design: consumer UX · design systems · component governance · high-fidelity UI · motion · rapid prototyping
Build: Next.js / React · AI-assisted development (Claude Code, Antigravity, NotebookLM) · Webflow
Tools: Figma · FigJam
